### Planning Applications

Using Local Authority planning information supplied and processed by Glenigan dating back 10 years, this information is designed to help you understand possible changes to the area around the property. Please note that even successful applications may not have been constructed and new applications for a site can be made if a previous one has failed. We advise that you use this information in conjunction with a visit to the property and seek further expert advice if you are concerned or considering development yourself.

## Visual and Cultural Designations

### Conservation Areas

Conservation Areas exist to protect special architecture and historic interest in an area. It may mean that the property is located in or close to a beautiful or architecturally interesting place to live. There may be extra planning controls restricting some development. This particularly applies to developing the outside of the building and any trees at the property.

Distance	Direction	Name	District
0	on site	Preston Park	The City of Brighton and Hove
4 m	W	Preston Village	The City of Brighton and Hove

This data is sourced from Local Authorities. For more information please see <https://historicengland.org.uk/listing/what-is-designation/local/conservation-areas/>.

## Registered Parks and Gardens

Registered parks or gardens are a designed landscape considered of historic interest.

Although the inclusion of a historic park or garden on the register in itself brings no additional statutory controls, local authorities are required by central government to consider registration material in planning terms, so local planning authorities must take into account the historic interest of the site when determining whether or not to grant planning permission.

## Air Quality

### Modelled Air Quality Readings

Defra publishes Background Concentration Maps of airborne pollutants, nitrous oxides (NO<sub>2</sub> and NO<sub>x</sub>) and particulate matter (PM<sub>10</sub> and PM<sub>2.5</sub>), for each year for Local Air Quality Management (LAQM) purposes.

The map for each year is modelled based on air quality monitoring and meteorological data gathered in a reference year. The current reference year is 2015. The maps divide the country into sectors. The concentrations for each sector account for pollution emitted within the sector itself and pollution that arrives from elsewhere, for example blown in by the wind.

The data presented here is the total estimated concentration of each pollutant in the sector that the site resides in, and the air quality objectives for each pollutant, which are taken from Defra's LAQM Technical Guidance document.

Pollutant	Local modelled reading (annual average)	UK Air Quality Objective (annual average)	UK Air Quality Objective (variable)
NO <sub>x</sub>	23 µg/m <sup>3</sup>	30 µg/m <sup>3</sup>	N/A
NO <sub>2</sub>	16 µg/m <sup>3</sup>	40 µg/m <sup>3</sup>	200 µg/m <sup>3</sup> (per hour - not be exceeded more than 18 times a year)
PM <sub>10</sub>	16 µg/m <sup>3</sup>	40 µg/m <sup>3</sup>	50 µg/m <sup>3</sup> (per 24hr period - not be exceeded more than 35 times a year)
PM <sub>2.5</sub>	11 µg/m <sup>3</sup>	25 µg/m <sup>3</sup>	N/A

#### Notes

Pollutant	Details
NO <sub>x</sub>	NO <sub>2</sub> and NO are both oxides of nitrogen and together are referred to as nitrogen oxides (NO <sub>x</sub> )
NO <sub>2</sub>	Nitric oxide (NO) is mainly derived from road transport emissions and other combustion processes such as the electricity supply industry. NO is not considered to be harmful to health. However once released to the atmosphere NO is usually very rapidly oxidized mainly by ozone (O <sub>3</sub> ) to nitrogen dioxide (NO <sub>2</sub> ) which can be harmful to health.
PM <sub>10</sub>	Particulate Matter less than 10µm in aerodynamic diameter. Particles less than or equal to 10 micrometers in diameter are so small that they can get into the lungs potentially causing serious health problems. Ten micrometers is less than the width of a single human hair.
PM <sub>2.5</sub>	Particulate Matter less than 2.5µm in aerodynamic diameter. Particles less than or equal to 10 micrometers in diameter are so small that they can get into the lungs potentially causing serious health problems. Particles of this size can only be seen with an electron microscope.

## Planning data limitations

The Planning Applications section of this report contains data provided under licence from Glenigan, who are the largest provider of planning data in the UK. As with any dataset of this size and complexity there are limitations, which are highlighted below.

The location of applications are represented in this report as single points and are derived from either the grid references provided by the applicant on the planning application form or by address finding software using the site address. This single point may not represent the nearest border of the development and may fall outside of the development boundary. The information contained within this report should be used in conjunction with a visit to the relevant local authority's website to determine the exact location of the development and how this may impact the subject property.

Groundsure have incorporated a dynamic search radius to ensure the most relevant data is presented. This variable search distance is based on House of Commons Library data which categorises areas according to the size of the settlement. Groundsure have distilled these into three core categories. These categories are large urban, urban and rural and the following search distances apply:

- Large urban: 250m for large projects, 50m for small projects and house extensions
- Urban: 500m for large projects, 250m for small projects and 50m for house extensions
- Rural: 750m for large projects, 500m for small projects and 125m for house extensions

Please note, the search radius assigned to this property is detailed within the planning section of the report.

Due to differing methodologies adopted by Local Authorities, some planning applications identified as having been refused may have subsequently been granted on appeal without appearing as such within this report. As such, if any refused applications be identified within this report, or should the existence or absence of a planning application, consent or similar have a material impact with regard to the decision to purchase a property, the client or beneficiary should make independent thorough enquiries of the Local Authority. Groundsure have excluded certain records of the publicly available data from this report which may have created duplications of reference to the same application. This includes, but is not limited to, data relating to applications such as amendments or variations of planning applications, discharge of conditions, or other associated applications. The report also excludes information on Lawful Development Certificates, Tree Preservation Orders, and other applications that are considered minor in terms of the level of construction. Additionally, an area of land may be identified for development within the local authority development plan, but for which no formal planning application exists. As such these are not included within the search.

Groundsure provides a web link to individual planning records in this report, but over time Local Authorities may have altered their website structure or record storage and so not all links may still be active. In the case of broken links, customers can use the planning application reference to search the Local Authority planning website manually. Due to data collection methods and processing time, there may be a period of up to 10 days between the application being published on the local authority website and appearing within the Groundsure report.

It is important to note the terms and conditions under which the report was sold, and in particular, whilst Groundsure makes every effort to ensure that data is sourced from reliable providers, it is unable to guarantee that the information is accurate, complete or up to date. Groundsure shall not be liable for any losses or damages incurred by the client or beneficiary, including but not limited to any losses or damages that arise as a result of any error, omission or inaccuracy in any part of the Groundsure Materials where such part is based on any Third Party Content or any reasonable interpretation of Third Party Content.

#### Complaints Advice

If you have a query or complaint about your search, you should raise it directly with the search firm, and if appropriate ask for any complaint to be considered under their formal internal complaints procedure.

If you remain dissatisfied with the firm's final response, after your complaint has been formally considered, or if the firm has exceeded the response timescales, you may refer your complaint for consideration under The Property Ombudsman scheme (TPOs). The Ombudsman can award up to £5,000 to you if the Ombudsman finds that you have suffered actual financial loss and/or aggravation, distress or inconvenience as a result of your search provider failing to keep to the Standards.

Please note that all queries or complaints regarding your search should be directed to your search provider in the first instance, not to TPOs.

#### COMPLAINTS PROCEDURE: If you want to make a complaint, we will:

- acknowledge it within 5 working days of receipt
- normally deal with it fully and provide a final response, in writing, within 20 working days of receipt
- liaise, at your request, with anyone acting formally on your behalf

Complaints should be sent to:
